

# Program of the 18<sup>th</sup> Symposium of Research Committee on Fungicide Resistance

Date and Time: April 29, 2008, 9:00-16:00

Place : Kunibiki Messe, 1-2-1 Gakuenminami, Matsueshi, Shimane 690-0826, Japan

tel.+81-852-24-1111; fax.+81-852-22-9219 <http://www.kunibikimesse.jp/>

Registration fee: 3,000 yen ( Students or Abstract book only, 2,000 yen )

Registration: Accept on Symposium site

## Program

- 9:00 Opening
- 9:10 - 9:40 Fungicide resistance in Shimane Prefecture  
Toshihide Tsukamoto (Shimane Agricultural Research Center)
- 9:40 - 12:00 Mode of action and resistance monitoring for new fungicides
1. Assay method for fluopicolide sensitivity of several Oomycetes species and monitoring results  
Yutaka Kuchii (Bayer Crop Science)
  2. Resistance risk assessment for mandipropamid and other CAA fungicides  
Ulrich Gisi (Syngenta)
  3. Mode of action, biological performance and latest monitoring results of boscalid sensitivity  
Gerd Stammler (BASF)
- 12:00 - 13:00 Lunch
- 13:00 - 13:45 Occurrence of resistant strains to boscalid in *Corynespora* leaf spot caused by *Corynespora cassiicola* on cucumber in Ibaraki Prefecture  
Takuya Miyamoto (Horticultural Research Institute, Ibaraki Agricultural Center)
- 13:45 - 15:05 Fluctuation of MBI-D-resistant populations of *Magnaporthe grisea* after withdrawal of the fungicide selection pressure
- 1 . In Tochigi Prefecture  
Yasuhiro Kobayashi (Tochigi Agriculture Environment Guidance Center)
  - 2 . In Saga Prefecture  
Junichirou Yamaguchi (Saga Agricultural Research Center)
- 15:05 - 15:20 Break
- 15:20 - 16:00 Management of fungicide resistance on rice blast caused by *Magnaporthe grisea*  
Research Committee on Fungicide Resistance
- 16:00 Closing
